Note to Architects and Interior Designers

We can supply all our profiles and inserts in custom colours to match the interior design.

Floor Joint Profiles

X-Joint FHD-SF

Heavy duty joint covers for use in car parks, warehouses and ramps. Installed after completion of the final floor finish.

8

X-Joint FHD2-SF

Heavy duty expansion joint for use in car parks, warehouses and ramps. Lower profile than FHD-SF. Installed after completion of the final floor.

9

X-Joint FHD-BS

High load capacity flush fit expansion joints for use on industrial floors subject to slow moving traffic (cars, trucks, forklifts, trolleys etc). Installed beneath the screed.

10

X-Joint FMD-SF

Medium duty joint covers for use in areas subject to heavy pedestrian and slow moving vehicular traffic. Installed after completion of the final floor finish.

11

X-Joint FMD2-SF

Medium duty expansion joints for use in areas subject to heavy pedestrian and slow moving vehicular traffic. Installed after completion of the final floor finish.

12

X-Joint FMD-BS

Medium load capacity flush fit expansion joint for floors in areas subject heavy pedestrian and slow moving cars. Installed beneath the screed.

13

X-Joint FRA-BS

Water resistant expansion joints for heavy pedestrian and slow moving vehicular traffic. Installed beneath the screed.

14

X-Joint FRA-SF

Water resistant expansion joints for heavy pedestrian and slow moving vehicular traffic. Installed after completion of the final floor finish.

15

X-Joint FLP-2BS

Stainless steel finish expansion joints for use with high end floor finishes. Installed beneath screed.

16

X-Joint CPS-F

High movement (seismic) expansion joint covers for use in car parks and areas subject to vehicular traffic. Installed after completion of the final floor finish.

17

X-Joint CPS-R

High movement (seismic) expansion joint covers for use in car parks and areas subject to vehicular traffic. Installed beneath the screed.

18

X-Joint FSJ-BS

Large movement seismic expansion joints for use in high end floor finishes with minimum effect of the appearance of the floor. Installed beneath the floor screed.

19

X-Joint FFJ-BS

Large movement seismic expansion joints for use with thin floor finishes, such as tile, vinyl or carpet, with minimum effect of the appearance of the floor. Installed beneath the floor screed.

20

Tile & Screed

X-Joint CJ1

Anodized aluminum neoprene construction joint for use with tiles and stone. Installed when floor finish is being laid.

21

X-Joint CJ2

Anodized aluminum neoprene construction joint for use with tiles and stone. Installed beneath the screed.

22

X-Joint CJ3

Stainless steel neoprene construction joint for use with tiles and stone. Installed when floor finish is being laid.

23

X-Joint CJ4

Anodized aluminum polyurethane/polyethylene construction joint for use with tiles and stone. Accepts higher movement than neoprene. Installed when floor finish is being laid.

24

X-Joint AJS

Extruded anodized aluminium joint separators for screed and floor finishes.

25

Wall & Ceiling Profiles

X-Joint SWJI

Extruded anodized joint covers used to cover exterior and interior joints on finished walls and ceilings.

26

X-Joint CWJI

Extruded anodized joint covers used to cover exterior and interior joints on finished walls and ceilings, with no visible fixings.

27

X-Joint SWJ2

High movement capacity anodized aluminum/PVC weather seal expansion joint for use in walls and ceilings in internal and external applications.

28

X-Joint CWJ2

Anodised aluminum expansion joint with integrated weather seal for use in wall and ceilings. Installed beneath the plaster or wall board to provide a flush finish with no visible fixings.

29

X-Joint SWJ3

Anodised aluminum expansion joint with integrated weather seal for use in wall and ceilings. Fixed directly on to the finished wall surface.

30

X-Joint CWJ3

Anodised aluminum/PVC floor expansion joint with visible weather seal for interior joints on walls and ceilings. Installed beneath the plaster or wall board to provide a flush finish with no visible fixings.

31

X-Joint SWJ4

Anodised aluminum/PVC floor expansion joint with visible weather seal for interior joints on walls and ceilings. Fixed directly on to the finished wall surface.

32

Roof Profiles

X-Joint RJ1

33

Anodized aluminium fully waterproof joint system that is used on roofs that will be subject to pedestrian traffic. It is used in joints widths of 15mm to 100mm.

X-Joint RJ2

34

High movement (seismic) anodised aluminium/PVC wall joint for use with a wall finish up to 16mm thick. Joint must be fixed on to a concrete or masonry substrate.

X-Joint RJ3

35

High movement (seismic) anodised aluminium/PVC wall joint for use with a wall finish up to 16mm thick. Joint must be fixed on to a concrete or masonry substrate.

Clip Strips

X-Joint ClipStrip F45C & F55C

36

Extruded aluminum joint covers that are suitable for use in a wide range of internal and external applications.

X-Joint ClipStrip F55F & F70F

36

Extruded aluminum joint covers that are suitable for use in a wide range of internal and external applications.

X-Joint ClipStrip W70C

36

Extruded aluminum joint covers that are suitable for use in a wide range of internal and external applications.

X-Joint ClipStrip W55G

36

Extruded aluminum joint covers that are suitable for use in a wide range of internal and external applications.

X-Joint ClipStrip C50

36

Extruded aluminum joint covers that are suitable for use in a wide range of internal and external applications.

Spring Clips SS40 & SS60

36

For fixing X-Joint Clip Strip series

Joint Seals

X-Joint EPS

Pre-formed waterproofing expansion joint seals for use in mechanical expansion joints.

37

X-Joint EPS HM

High movement (seismic) waterproofing expansion joints for use in vertical and horizontal applications such as walls and slabs.

38

X-Joint EPS2

High movement (seismic) waterproofing expansion joints to be used behind joint cover plates

39

Stair Nosing

X-Joint SN 45 AA1

Extruded Anodized aluminium stair nosings.

40

X-Joint SN 45 AA2

Extruded Anodized aluminium stair nosings.

40

X-Joint SN 45 RS

Extruded Anodized aluminium stair nosings.

40

X-Joint SN 45 Carbo™1

Extruded Anodized aluminium stair nosings.

40

X-Joint SN 45 Carbo™2

Extruded Anodized aluminium stair nosings.

40

Floor Skirting

X-Joint Skirting

Anodized aluminium floor skirting

41

Note to Architects and Interior Designers

We can supply all our profiles and inserts in custom colours to match the interior design.

Description

Heavy duty joint covers for use in car parks, warehouses and ramps.

Installed after completion of the final floor finish.

Materials

Anodized aluminium 6063/T6.

Can also be supplied in mill finish aluminium.

Supply Lengths

4m, custom lengths can be produced to order to minimize wastage.

EPS Joint Seal: 20m roll

Supplied with stainless steel anchors and screws.

Type	A	B	C
Flat Profile			
FHD-SF 110/40	5 to 40	110	6
FHD-SF 155/70	41 to 65	155	8
FHD-SF 185/100	66 to 100	185	9
FHD-SF 260/150	101 to 150	260	12
FHD-SF 325/200	151 to 200	325	12
Corner Profile			
FHD-SF/C 110/40	40 to 50	122	9
FHD-SF/C 155/70	51 to 70	122	9
FHD-SF/C 185/100	71 to 100	122	9

Dimensions in mm

Description

Heavy duty expansion joint for use in car parks, warehouses and ramps. Lower profile than FHD-SF.

Installed after completion of the final floor finish.

Materials

Anodized aluminium 6063/T6.

Supply Lengths

4m, custom lengths can be produced to order.

FHD2-SF profiles have the same load capacity as FHD-BS series provided that they are installed as shown in the drawing below.

Type	A	B	C	D	Total Movement
Flat Profile					
FHD2-SF 80	80	230	75	21	32
FHD2-SF 100	100	250	75	21	55
FHD2-SF 125	125	268	72	23	55
FHD2-SF 150	150	308	79	27	72

Dimensions in mm

Description

High load capacity flush fit expansion joint for use on industrial floors subject to slow moving traffic (cars, trucks, forklifts, trolleys etc).

Installed beneath the screed.

Materials

Anodized aluminium 6063/T6.

Supply Lengths

4m, custom lengths can be produced to order.

Load Capacity

Maximum Axle Load:

FHD-BS 50: 6 tons

FHD-BS 75: 5 tons

FHD-BS 100: 4 tons

Type	A	B	C	D*	Total Movement
Flat Profile					
FHD-BS 50	50	84	158	28	30
FHD-BS 75	75	119	195	30	40
FHD-BS 100	100	144	232	30	50

*Profile height "D" can be increased using X-Roc ResiCrete S or X-Tite Strong Bond.

Dimensions in mm

Description

Extruded anodized aluminum joint covers for Floors in areas with heavy pedestrian traffic.

Materials

Anodized aluminium 6063/T6.
Can also be supplied in mill finish aluminium.
Joint Seals: PVC

Supply Lengths

Profile: 4m
Joint Seals: 20m roll
Custom lengths can be produced to order.
